E1-1 - Navigation Menu

Feature	Scenario	Steps	Test Result
Navigation Menu	Display and visit the menu links	Feature: Navigation Menu Scenario Outline: Navigate through menu options Given the user enters the Gardening Web Store page When the user clicks on <option> Then they should see the <page> And the URL should be <url> Examples: option page url home home https://web-qa.dev.adalab.es/ about us about us https://web-qa.dev.adalab.es/about products products https://web-qa.dev.adalab.es/products contact contact https://web-qa.dev.adalab.es/contact	Failed

E1-2 - Home Page

Feature	Scenario	Steps	Test Result
Home Page	Verify the home page is displayed	Given the user accesses the page When the user visits home page Then the user should see "Gardening Web Store" And the user should see a brief description And the user should see an image of the store And the user should see the "Products Page" button	Passed
Home Page	Button to Open the Store's Products Page	Given the user is on the home page When the user clicks the "Products Page" button	Passed

Feature	Scenario	Steps	Test Result
		Then the user should be redirected to products page	

E1-3 - About Us Page

Feature	Scenario	Steps	Test Result
About Us	Verify About Us page displays required information	Given the user is on the Gardening Web Store homepage When the user visits "About Us" page Then the user should see the title "About Us" And they should see information about the store's history and values And they should see an image of the team And the page should be responsive	Failed

E1-4 - Products Page

Feature	Scenario	Steps	Test Result
Products Page	Display products page content correctly	Given the user is on the Gardening Web Store homepage When the user clicks on "products" Then the page title should be "Our Products" And a list of products should be displayed And each product should show the category, name, and price And the page should be responsive	Passed

E1-5 - Product Filters

Feature	Scenario	Steps	Test Result
Product Filters	Filter by price range valid	Given the user is on the Products page with no filters applied When the user sets price range minimum "<min_price>" and maximum "<max_price>" Then only products with price between "	Failed

Feature	Scenario	Steps	Test Result
		<min_price>" and "<max_price>" should be displayed Examples: min_price max_price 5 20 25 50 60 100	
Product Filters	Filter by max price valid	Given the user is on the Products page with no filters applied When the user sets maximum price to "<max_price>" Then only products with price less than or equal to "<max_price>" should be displayed Examples: max_price 20 50 100	Failed
Product Filters	Filter by min price valid	Given the user is on the Products page with no filters applied When the user sets minimum price to "<min_price>" Then only products with price greater than or equal to "<min_price>" should be displayed Examples: min_price 5 25 60	Failed

Feature	Scenario	Steps	Test Result
Product Filters	Combine all filters valid	Given the user is on the Products page with no filters applied When the user applies a name filter "<product_name>" And the user applies a price filter with minimum "<min_price>" and maximum "<max_price>" And the user applies a category filter "<category>" Then only products matching all selected filters should be displayed Examples: product_name min_price max_price category Sansevieria 5 25 Plants Ficus Lyrata 10 35 Plants Maceta Colgante 10 20 Pots	Failed
Product Filters	Clear Filters button not visible when no filters are active	Given the user is on the Products page with no filters applied Then the "Clear Filters" button should not be visible	Passed
Product Filters	Display full product list with no filters applied by default	Given the user navigates to the Products page And no filters should be active Then the full product list should be displayed And the "Clear Filters" option should not be visible	Passed
Product Filters	Filter by valid category	Given the user is on the Products page with no filters applied When the user selects "<category>" from the category filter Then only products belonging to "<category>" should be displayed Examples: category Plants Tools Pots	Passed
Product Filters	Filter products by valid name	Given the user is on the Products page with no filters applied When the user enters "<product_name>" in the name filter Then only products whose name contains "<product_name>" should be displayed Examples: product_name Ficus Lyrata	Passed

Feature	Scenario	Steps	Test Result
		Maceta Colgante Regadera Metálica	
Product Filters	Combine all filters invalid	Given the user is on the Products page with no filters applied When the user applies a name filter "Sansevieria" And the user applies a price filter with minimum "80" and maximum "20" And the user applies a category filter "Plants" Then an error message should be displayed	Failed
Product Filters	Clear all filters and see all products	Given the user is on the Products page And the user has applied a name filter "Sansevieria" And the user has selected category "Plants" And the user has set the price filter with minimum "5" and maximum "50" When the user clicks the "Clear Filters" button Then all filters should be removed And the full list of products should be displayed And no filters should remain active	Failed
Product Filters	Filter by invalid name	Given the user is on the Products page with no filters applied When the user enters "<product_name>" in the name filter Then an informative message "No products found" should be displayed And no products should be shown Examples: product_name XYZ123	Passed
Product Filters	Filter by min price invalid	Given the user is on the Products page with no filters applied When the user sets minimum price to "-5" Then no products should be displayed And an informative message "No products found" should be shown	Passed
Product Filters	Filter by name invalid	Given the user is on the Products page with no filters applied When the user sets maximum price to "-10" Then no products should be displayed And an informative message "No products found" should be shown	Failed

Feature	Scenario	Steps	Test Result
Product Filters	Filter by price range invalid (min > max)	Given the user is on the Products page with no filters applied When the user sets price range minimum "50" and maximum "20" Then no products should be displayed And an informative message "No products found" should be shown	Failed

E1-6 - Contact Page

Feature	Scenario	Steps	Test Result
Contact Page	Submit form with valid required fields	Given the user is on the web page When the user visits the "Contact" page And the user fills out the form with the following required fields <Name>,<Email>,<Message> And submit the form Then a confirmation message is displayed Examples: Name Email Message Ana Perez ana@gmail.com I want to know more Belén García belen_garcia123@gmail.com I want to know more	Passed
Contact Page	Submit form with empty required fields	Given the user is on the web page When the user visits the "Contact" page And the user fills out the form with one required field left empty <Name>,<Email>,<Message> Then The user should see an error message stating "The field cannot be empty" Examples: Name Email Message Vacio ana@gmail.com I want to know more Belén García vacio I want to know more Ana Perez ana@gmail.com vacio	Failed
Contact Page	Submit form with invalid email	Given the user is on the web page When the user visits the "Contact" menu And the user clicks the "Contact us" button And the user filled out the form with the email field incorrectly <Name>,<Email>,<Message> Then The user should see an error message stating "The email format is incorrect." Examples: Name Email Message Ana Perez @gmail.com I want to know	Failed

Feature	Scenario	Steps	Test Result
		more Ana Perez anagmail.com I want to know more Ana Perez ana@gmailcom I want to know more Ana Perez ana I want to know more	
Contact Page	Submit form with valid required and optional fields	Given the user is on the web page When the user visits the Contact page And fills out the form with valid required and optional fields <Name>,<Email>,<Message>,<Phone number> Then a confirmation message is displayed after successfully submitting the form Examples: Name Email Message Phone number Ana Perez ana@gmail.com Quiero saber mas 258369147 Belén García belen_garcia123@gmail.com Quiero saber más +34 741852963	Passed
Contact Page	Maximum message length: 500 characters	Given the user is on the web page When the user visits the "Contact" page And the user fills out the form with required fields <Name>,<Email> And the user fills with invalid <Message> Then The user should see an error message stating "Message (required, maximum 500 characters)." Examples: Name Email Message Ana Perez ana@gmail.com Enter a text of 501 characters.	Failed
Contact Page	Submit form with invalid phone number	Given the user is on the web page When the user visits the "Contact" page And fills out the form with the required fields <Name>,<Email>,<Message> And fills out phone number with invalid <Phone> Then The user should see an error message stating "The phone format is incorrect." Examples: Name Email Message Phone number Ana Perez ana@gmail.com Quiero saber mas 2 Belén García belen_garcia123@gmail.com Quiero saber más letters Belén García belen_garcia123@gmail.com Quiero saber más */?¿\$	Failed

E1-7 - Shopping Cart

Feature	Scenario	Steps	Test Result
Shopping Cart	Open the shopping cart page	Given the user opens the website menu When they click on the shopping cart icon Then the shopping cart page is displayed	Passed
Shopping Cart	Remove a product from the cart page	Given a user willing to remove a product When the user removed a product from the cart page Then the product is removed from the cart And the summary is updated	Passed
Shopping Cart	See Purchase Summary Details	Given a user willing to see the purchase summary When there are products in the cart Then a summary appears displaying the total amount And The 21% VAT amount. And The shipping cost, which will be €5. And The total purchase amount, which will be the sum of the products plus VAT plus shipping.	Passed
Shopping Cart	Clear cart	Given a user having products in the cart When the user clicks the empty cart button Then the cart is cleared And the empty cart button its not available	Passed
Shopping Cart	Continue shopping	Given the user is on the shopping cart page And products are added to the cart When the user clicks the continue shopping button Then the user should see products page And the user can continue adding products to the cart.	Passed
Shopping Cart	See products button	Given a user is on the shopping cart page and the shopping cart is empty When clicks on see products button Then they should see products page	Passed
Shopping Cart	Click see products button	Given a user navigating to an empty cart page When a user clicks the see products button Then the user goes to the product page	Passed
Shopping Cart	Add a product to the shopping cart	Given the user navigates to the product page When the user adds a product to the cart Then the cart page should display information of the added product: name	Passed

Feature	Scenario	Steps	Test Result
		image category price And the summary is updated	
Shopping Cart	Remove a product from the product page	Given a user willing to remove a product When the user removed a product from the product page Then the product is removed from the cart	Passed
Shopping Cart	Remove item from the cart	Given a user willing to update the cart When the user removes a product from the cart Then the price must be updated accordingly And The 21% VAT amount must be updated accordingly And The shipping cost won't change And The total purchase amount will be updated accordingly.	Passed

E1-8 - Checkout

Feature	Scenario	Steps	Test Result
Checkout	Complete checkout with invalid email	Given the user is on the checkout page When the user fills the form with required data <Full Name>, <Address>, <Valid Card Number> And the user fills the form with invalid email <Email> And the user submits the form Then the form should display a validation error because the email is invalid. Examples: Full Name Email Address Valid Card Number Ana Perez @gmail.com Calle Madrid, 4 4242 4242 4242 4242 Belén Díaz anagmail.com Calle Jesús, #4 4242 4242 4242 4242 Ana Perez ana@gmail Calle Jesús, #4 4242 4242 4242 4242 Ana Perez ana Calle Madrid, 4 4242 4242 4242 4242	Failed
Checkout	Complete checkout form with valid data	Given the user is on the checkout page When the user fills in the form with valid <Full Name>, <Email>, <Address>, <Valid Card> Then the form is submitted successfully And the user see order completed page Examples:	Failed

Feature	Scenario	Steps	Test Result
		Full Name Email Address Valid Card Number Ana Perez ana@gmail.com Calle Madrid, 4 4242 4242 4242 4242 Belén Díaz belen_diaz123@gmail.com Calle Jesús, #4 4242 4242 4242 4242	
Checkout	Complete checkout form with one required field empty	Given the user is on the checkout page When the submit submits the form with an empty required field <Full Name>, <Email>, <Address>, <Valid Card Number> Then the form should display a validation error because a required field is empty Examples: Full Name Email Address Valid Card Number Empty ana@gmail.com Calle Madrid, 4 4242 4242 4242 4242 Belén Díaz Empty Calle Jesús, #4 4242 4242 4242 4242 Ana Perez ana@gmail.com Empty 4242 4242 4242 4242 Ana Perez ana@gmail.com Calle Madrid, 4 Empty	Passed
Checkout	Complete checkout with Invalid Card Number	Scenario Outline: User attempts checkout with invalid card number Given the user is on the checkout page When the user fills the form with required data <Full Name>, <Address>, <Email> And the user fills the form with <Invalid Card Number> Then the form should display a validation error because the Card Number is invalid. Examples: Full Name Email Address Invalid Card Number Ana Perez ana@gmail.com Calle Madrid, 4 less than 16 digits Belén Díaz ana@gmail.com Calle Jesús, #4 letters Ana Perez ana@gmail.com Calle Jesús, #4 */?¿\$ Ana Perez ana@gmail.com Calle Madrid, 4 more than 16 digits	Passed
Checkout	View Order Summary	Given the user is on the shopping cart page And there are products in the shopping cart When the user clicks the "Checkout" button Then the user is redirected to checkout page And an "Order Summary" is displayed with the following information: List of products with their individual prices Subtotal: sum of the price of all products VAT (21%): total VAT applied	Passed

Feature	Scenario	Steps	Test Result
		Shipping: €5 Total: sum of all amounts	
Checkout	Back to Shopping Cart Button	Given the user is on the checkout When the user clicks the "Back to shopping cart" button Then the shopping cart page is displayed	Passed
Checkout	Complete Purchase Button (Invalid Form Data)	Given the user is on the page https://gardeningwebstore.com/orders And the "Shipping and Payment Information Form" is displayed And at least one field in the form is invalid When the user clicks the "Complete Purchase" button Then an error message is displayed	Passed
Checkout	Visit order complete buttons	Given the user is on the order complete page When the user clicks the <button> Then the <page> is displayed Examples: button page Back to Store Products Home Home	Passed
